

Lexis® Analytics Malaysia

Experience the
Future of Litigation

WHAT IF you could craft winning litigation strategies and advise your client faster than usual?

WHAT IF you could analyse the historical outcomes of legal issues at a glance?

WHAT IF you could convert hours of extensive search into minutes of actionable insights?

WHAT IF you could visualize all relevant legal issues from your brief instantly?

Introducing Lexis[®] Analytics Malaysia

Lexis[®] Analytics Malaysia is the first of its kind analytics tool designed to revolutionize the practice of litigation with advanced knowledge extraction capabilities, giving you unsurpassable data-driven insights. The power of artificial intelligence that's deeply embedded in Lexis Analytics Malaysia is deployed across thousands of case law data to pinpoint related and relevant legal issues and to analyze your case outcome in an intelligible visualization, helping you spot your winning strategy in a glance, and plan informed tactical moves in your legal battle.

Delivering a new litigation experience with groundbreaking legal analytics

Lexis Analytics Malaysia is designed to enable legal practitioners to best strategize and plan tactical moves in their practice of litigation. This powerful tool boasts advanced knowledge extraction capabilities powered by Deep Learning, Knowledge Graphs and Natural Language Understanding technologies.

5 unique benefits of Lexis® Analytics Malaysia

01

Work faster than ever before and analyse your case in a glance with analytics-enhanced capabilities.

02

Construct your winning strategy with data-driven insights, infusing unrivalled confidence and strength into your case.

03

Anticipate outcomes with comprehensive data visualisation extracted by AI-enabled tools.

04

Leave no stones unturned and formulate your strongest argument with thousands of data from a reliable legal database.

05

Get the competitive advantage in the constantly evolving law with the best tool in hand.

Competitive intelligence from draft to trial

Experience a paradigm shift in your case discovery phase with the competitive intelligence you need in conceptualising your strategy.

Get started by simply typing in information from your matter in free text into the **Input Box**, without having to identify key phrases as required in conventional search. The Artificial Intelligence integrated in the system identifies key facts, legal issues, and various entities (such as case citations, legislation reference, courts and jurisdictions) from your input text, and provides the legal issue outcome analytics based on historical case law data.

The screenshot shows the Lexis Analytics Malaysia web interface. At the top left is the Lexis Analytics Malaysia logo, and at the top right is a 'More' link. The main heading is 'Analyse your case'. Below this is a section titled 'Enter Your Brief / Matter' with a sub-instruction: 'Submit details of your case for analysis, for example, legal issues, cause of action, offences, key facts. We will provide analysis drawn from relevant legal issues in case law. Note: Enter up to a limit of 5,000 characters.' A 'Show Samples' button is located below the instruction. A large text input field follows, with the placeholder text 'Enter legal issue or cause of action here' and a character count '0/5000' on the right. Below the input field are 'Clear' and 'Analyse' buttons. The footer contains the LexisNexis logo and links for 'About', 'Privacy Policy', 'Cookie Policy', and 'Terms & Conditions'.

Raising the bar with data-driven insights

Uncover legal issues and reference patterns, trends and outcomes to support your position. Get insights into litigation outcomes, for cases involving legal issues and facts similar to your matter with the **Case Outcome Analysis** charts. Narrow down into a specific legal issue or fact to analyze the percentages of favorable and unfavorable outcomes. You can look even further, to analyze the subsequent judicial treatment, and to understand the authoritative strength of the cases with favorable or unfavorable outcomes.

“Lexis Analytics Malaysia helps pinpoint the areas that one should be looking into. The analysis of the success rate of the different cases would help you to gauge how a particular issue is viewed by the courts (whether positively or negatively), and that would in some way help you in devising a legal strategy and in advising your client. I think Lexis Analytics Malaysia is a step in the right direction.”

Michael Yap, Tommy Thomas 

Build your case on the best authority

Rely on Lexis Analytics Malaysia and build your case based on the most accurate authority. Turn insights into actions with integrated case recommendation. Lexis Analytics Malaysia retrieves a list of case law documents from the identified legal issues with a summary of key factors and outcome, including a link to the full text on Lexis Advance®. **Recommended Cases** helps expedite your case law search and zero in on relevant cases, giving you crucial support for your argument or a newly overturned decision.

The screenshot displays the Lexis Analytics Malaysia interface. At the top, the logo and 'More' link are visible. Below is a section for 'Recommended Cases (173)'. On the left, there are filter options for 'Filter by' (Reset), 'Relevant Legislation' (arts 140 and 135 of Federal Constitution, MYFC, MYCA), and 'Courts' (Malaysia Federal Court, Malaysia Supreme Court, Malaysia Privy Council, Malaysia Court of Appeal, Malaysia High Court). The main content area lists three cases:

- 1. OWI CHENG IAN v SURUHAN JAYA PASUKAN POLIS DIRAJA MALAYSIA & ORS**
